The IDB has approved a \$250 million loan to increase electricity coverage in rural Guatemala. A planned program will include the development of renewables-plus-storage ...

Why Guatemala is the Next Big Player in Energy Storage a country where 35% of electricity still comes from firewood, yet its untapped solar potential could power all of Central America. ...

In 2018, Guatemala derived 57.43% of its total energy supply from biofuels and waste, followed by oil (29.54%), coal (7.68%), hydro (3.22%), and other renewables such as wind and solar (2.12%).

Guatemala is at risk of losing a staggering 800 MW of solar capacity due to severe grid congestion, a critical issue that could derail the nation's renewable energy goals.

The paper examines key advancements in energy storage solutions for solar energy, including battery-based systems, pumped hydro storage, thermal storage, and emerging technologies.

Dutch clean energy developer MPC Energy Solutions has started construction of a 65MWp solar project in Guatemala, and plans to commission the project by mid-2025.

As the country aims to reduce reliance on fossil fuels and stabilize its grid, energy storage systems are becoming critical. Let's explore how this Central American nation is harnessing ...

According to the National Electric Energy Commission, renewable energy accounts for over 60% of the country's electricity generation, primarily from hydroelectric, solar, and wind sources.

While solar and wind power still play a limited role as marginal technologies, they are displacing increasing
