How does Guyana generate electricity?

Guyana primarily relies on heavy fuel oil for electricity generation (Figure 9). The vertically integrated, state-owned company called Guyana Power and Light (GPL) controls almost all of the country's electric power sector.

Does Guyana have a potential for hydropower?

Guyana has significant potential for hydropower, like its neighbor Suriname which has successfully developed hydro power programs. Renewable energy is viewed as a potential solution by the GoG to reduce the cost of power and provide reliable electricity.

What does the Guyana Energy Agency do?

The Guyana Energy Agency is responsible for overseeing feasibility studies for the integration of renewable energy programs in Guyana and has regulatory oversight over certain aspects of the energy industry, in addition to the Ministry of Public Works.

Is Guyana a good country for electricity?

Despite Guyana's potential in hydropower and bagasse-based power generation, Guyana's installed capacity comes primarily from diesel-engine-driven generators. This high use of fossil fuels makes the electric power sector expensive and unreliable; electricity costs average \$0.32 per kilowatt-hour, which is among the highest in the region.
