Is Surabaya a pilot city for energy transition in Indonesia?

Surabaya, Indonesia Sentinel -- Surabaya, the capital of East Java, has been selected as a pilot city for energy transition and efficiency efforts in Indonesia. The city officially launched its building sector decarbonization program on April 16, 2025, under the Sustainable Energy Transition in Indonesia (SETI) initiative.

Who is involved in the battery energy storage system project?

Subsidiaries of PLN involved in the Battery Energy Storage System project happen to be the primary electricity providers in Indonesia, such as PT Indonesia Power, PT Pembangkitan Jawa Bali, and others. The plan to develop an energy storage system aligns with the positive growth in the renewable energy industry.

Why was Surabaya chosen as a transition energy model city?

Surabaya was chosen for transition energy model city considering its considerable energy-saving potential, existing green building certification framework, rapidly growing construction sector, and the capacity of local stakeholders to manage energy transition projects.

Why should we develop an energy storage system?

The plan to develop an energy storage system aligns with the positive growth in the renewable energy industry. This growth is also visible in countries like Indonesia, where the Central Government has set an optimistic target of 23% usage of renewable energy by 2025.

GSL ENERGY, as a specialized BESS manufacturer, can customize home energy storage and commercial and industrial energy storage solutions for homes, resorts, factories, ...

Targeting the electricity needs of remote areas and islands in Indonesia, EVE Energy unveiled two new household energy storage ...

Best Energy System is an authorized distributor in Indonesia that specializes in electrical power solutions, including various energy storage products like batteries and chargers.

This paper presents a concept that combines photovoltaic (PV) systems with energy-storing bricks to create a self-sufficient home that can produce and store its own ...

In INDONESIA, demand for home energy storage is rising as consumers prioritize energy resilience, particularly in areas prone to blackouts or unreliable grid service.

GSL ENERGY, as a specialized BESS manufacturer, can customize home energy storage and commercial and industrial energy ...

The SETI project, a joint effort between the Indonesian and German governments, is designed to accelerate the decarbonization of ...

The Indonesia Residential Energy Storage market is witnessing rapid growth, with key players like Tesla and LG Chem leading the way. These companies offer advanced energy storage ...

The SETI project, a joint effort between the Indonesian and German governments, is designed to accelerate the decarbonization of the industrial and building sectors through the ...

Surabaya City, East Java, has officially started the implementation of decarbonization of the building sector through the Sustainable Energy Transition in Indonesia ...

Indonesia has recently launched a 5 megawatt Battery Energy Storage System (BESS). The new energy ...

Here's the bottom line: Indonesia's energy landscape isn't getting simpler. Between El Niño's impact on hydropower and the coal phaseout roadmap, home storage is shifting from luxury to ...

Best Energy System is an authorized distributor in Indonesia that specializes in electrical power solutions, including various energy storage products ...

Indonesia has recently launched a 5 megawatt Battery Energy Storage System (BESS). The new energy storage system is a device that enables energy from renewables to ...

Targeting the electricity needs of remote areas and islands in Indonesia, EVE Energy unveiled two new household energy storage systems for the first time overseas: a ...
