What are the future directions of 5G in Southeast Asia?

This report provides essential insights into the current state and future directions of 5G across six key Southeast Asian markets. Singapore leads the region, with telcos achieving 95% coverage and exploring enterprise use cases. Meanwhile Indonesia, Malaysia, Philippines and Vietnam face challenges expanding 5G beyond major cities.

Does the US support a 5G project in Southeast Asia?

The US has already supported an ASEAN study on best practices for implementing 5G in Southeast Asia, which highlighted the potential of O-RAN in the region. The challenge will be in addressing the wide range of concerns among Southeast Asian countries that are at different stages in their development.

Will Southeast Asian telecommunication companies roll out 5G?

In recent months, announcements of successful tests by various Southeast Asian telecommunication companies in RedCap ("reduced capacity") 5G have been a reminder of the region's gradual rollout of fifth-generation networks.

Where is 5G rolling out in the Sea region?

5G roll-out is progressing steadily but unevenly across the SEA region. Singapore, Thailand and Malaysia are leading the charge with aggressive infrastructure development and competitive pricing. The remaining regional markets are expected to catch up soon.

By 2025, 5G will make up 14% of all mobile connections in Asia-Pacific, rising from 200 million in 2021 to 430 million. In Southeast ...
