How many tons a year can a port of Malabo treat?

The port of Malabo can theoretically reach a treatment capacity of 200,000 tons/year. The main maritime links are with national destination to Bata and international to Spain and Douala in Cameroon. The Malabo International Airport serves the city. It is located 7 km from the centre in Punta Europa, Bioko.

Where is Malabo located?

Malabo (/m?l?:bo? /m?-LAH-boh, Spanish: [ma'la?o](i); formerly Santa Isabel ['santajs'a?'el](i)) is the capital of Equatorial Guinea in the province of Bioko Norte. It is located on the north coast of the island of Bioko (Bube: Etulá, and as Fernando Pó by the Europeans). In 2018, the city had a population of approximately 297,000 inhabitants.

What buildings are preserved in Malabo?

Malabo has preserved buildings from the colonial era, such as the Presidential Palace and the Palace of Justice of Malabo. Other colonial buildings are also found downtown, although they are worn; for example the wooden 19th-century buildings on Nigeria and Rey Boncoro streets.

How do Mopo batteries work?

Our solar power stations distribute energy through proprietary MOPO Batteries managed by a network of local agents. The 50Wh MOPO50 Battery provides low-income households with basic energy access for lighting, phone charging and Direct Current (DC) appliances. The 1kWh MOPOMax provides a pay-per-use service that replaces petrol generators.

a sun-soaked industrial zone in Malabo, Equatorial Guinea, where a cutting-edge energy storage facility is quietly rewriting the rules of renewable energy. The Malabo Industrial ...

The main sports facility of Malabo, and the country, is the Estadio de Malabo, with a capacity of 15,250
