What is wind power?

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets. It contains data about wind farms, turbines, manufacturers, developers, operators, owners and also pictures and cartographical data

Can the wind power customize data?

The Wind Power can also customize data to your precise market needs on request. Our policies of transparency and excellent reactivity place our customers, users, and data providers at the center of our business. Feel free to contact us directly about any questions you may have, or before placing an on-line order.

How often does the wind power update data?

We include not only large, high-profile projects, but also the smaller, independent ones. Our data is checked and revised over a rolling period of six months. We offer one-, two- or three-year update packages on an annual, bi-annual, quarterly or monthly basis. The Wind Power can also customize data to your precise market needs on request.

Details City: Nicosia 55 turbines: (manufacturer name not available) Total nominal power: 46,750 kW
