What is energy in Uruguay?

Energy in Uruguay describes energy and electricity production, consumption and import in Uruguay. As part of climate mitigation measures and an energy transformation, Uruguay has converted over 98% of its electrical grid to sustainable energy sources (primarily solar, wind, and hydro).

How much electricity does Uruguay generate?

According to 2022 data from MIEM, Uruguay generated 14,759 GWh of electricity, 13,343 GWh for internal demand and exported 1,416 GWh to Brazil and Argentina. Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity.

Why does Uruguay generate a surplus of electricity?

Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.

Are photovoltaic solar power plants legal in Uruguay?

A number of photovoltaic solar power plants have been built. The use of nuclear energy in Uruguay is prohibited by law 16.832 of 1997.

Despite its heavy reliance on hydropower for baseload power that acts as a natural battery, there is growing interest in battery storage solutions for grid stability and ...

6Wresearch actively monitors the Uruguay Energy Storage System Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, ...

In 2017-2022, our company was committed to development and production of outdoor power supply products.
