How much does a solar panel cost in London?

It typically costs $\pounds 766$ to buy and install a 350-watt solar panel in London. That means a typical three-bedroom household will pay $\pounds 7,659$ for an array with 10 solar panels. To find out more about the kind of prices you're looking at, check out our Solar Panel Costs guide. Are there any solar panel grants from local councils in London?

How much does it cost to install solar panels?

The short answer: it depends on your home and needs. The cost of installing solar panels can range from around $\pounds 4,000$ to $\pounds 10,000$ or more, depending on the system size. Key factors include the size of your solar array (number of panels), your household's electricity usage, whether you add a battery, and even your roof characteristics.

How much does a solar system cost in the UK?

Starting with some base figures, solar systems in the UK start around the $\pounds 3,500$ mark but often top out at $\pounds 20,000$. To put that in perspective, let's look at a case study of a typical UK house. Please note: these figures don't consider the average annual (est. 3.6-10%) increase in electricity costs from providers.

Should you buy solar panels in London?

You can also cut your CO2 emissions by at least 12.5 tonnes over the course of your solar panels' lifespan - an 11% reduction in your carbon footprint. So it's absolutely worth buying solar panels in the capital, as long as you're a homeowner who can afford how much solar panels cost. How much sunlight does London receive?
