How much do solar panels cost in Georgia?

On average, installing solar panels in Georgia costs about \$19,635 after taking into account the federal solar investment tax credit. That's roughly 17% more than the U.S. average of \$16,715. While solar panels in Georgia are relatively pricey, the savings over 25 years can add up to \$23,182. That can make it well worth going solar.

How much energy does Georgia get from solar panels?

Georgia currently gets nearly 3.5% of its electricity from solar panels, which is enough to power more than 359,000 homes. Georgia solar panels can help residents save \$1,700 on energy bills each year. Discover the potential savings with Choose Energy.

Are solar panels a good investment in Georgia?

The federal solar tax credit and Georgia's net metering program helps reduce the expense. Secondly, solar panels are most effective on homes with lots of sunshine. Georgia gets plenty of sunlight, but some homes may have issues with shade from trees or taller buildings.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Average solar panel installation costs range from \$8,875 to \$25,357 in Georgia. How much you actually spend depends on the size of your system, what incentives you're eligible for ...

In Georgia, a solar panel installation would cost you between \$2.55 and \$3.55 per watt. That means a 5- to 6-kilowatt installation could run anywhere from \$12,750 to \$21,300.
