Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Explore Hungary's EUR2.1B residential battery subsidy. Learn how LiFePO₄ energy storage battery technology and home energy storage solutions are transforming the Hungarian ...

New Hungarian nuclear units decrease the CO₂ emissions of electricity generation and don't limit market conditions of renewables. Batteries lack profit on price-arbitrage basis, thus their ...

In this interview with Peter Kaderják, we explore Hungary's rapidly evolving battery industry and its role in Europe's green transition.

Hungary is rapidly becoming a key player in Europe's electric vehicle battery market. With billions in investments, the country is positioning itself as a leading battery ...

HUBA - the one-stop-shop to the Hungarian battery value chain! Peter Kaderják, PhD.

In March 2025, a major step of increased solidarity was the cooperation of eight mayors and cities against the - once already banished, but later returned - battery recycling plant (Andrada) in ...

In order to integrate renewable energy production into the system, it is essential to ensure the sustainable operation of energy supply systems, one of the most efficient means of which is ...

Situated at the Dunamenti Power Station in Százhalombatta, the new battery energy storage system builds on MET Group's earlier 4 MW / 8 MWh demonstrator plant ...

Hungary seeks to play a bridging role between Western car manufacturers and Asian battery producers, in line with its policy of economic connectivity and economic neutrality.
