India's Ministry of Power (MoP) has issued a significant regulatory update requiring all new solar photovoltaic (PV) power tender ...

India's Ministry of Power (MoP) has issued a significant regulatory update requiring all new solar photovoltaic (PV) power tender projects to be equipped with at least 2 hours of co ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ...

India's clean energy transition is entering a new era -- where sunlight captured during the day now powers homes and factories through the night. With record-breaking ...

In a bold move to strengthen its renewable energy infrastructure, the Indian government has officially mandated the integration of energy storage systems (ESS) with all future solar projects.

Graph 1 shows the journey of solar PV plus BESS development in India, highlighting why 2024 has witnessed a rise of this combination of technologies in India's ...

India's renewable energy push crossed a psychological and structural milestone in 2025, with record capacity additions, deeper domestic manufacturing and a clearer shift from ...

India's commitment to a sustainable energy future is evident through its multifaceted approach to battery energy storage. The ...

The Indian government mandates future solar project tenders to include energy storage systems with a minimum of two hours of storage capacity, ensuring grid stability.

Graph 1 shows the journey of solar PV plus BESS development in India, highlighting why 2024 has witnessed a rise of this ...

India's Power Ministry has issued an advisory requiring new solar power projects to incorporate energy storage systems to enhance grid stability and reduce power costs, ...

India's Ministry of Power has mandated all renewable energy implementing agencies and state utilities must incorporate a minimum of two-hour co-located energy storage ...

India's Ministry of Power has mandated all renewable energy implementing agencies and state utilities must incorporate a minimum of ...

India's commitment to a sustainable energy future is evident through its multifaceted approach to battery energy storage. The government has mandated that solar PV ...

In a bold move to strengthen its renewable energy infrastructure, the Indian government has officially mandated the integration of energy storage ...

The Indian government mandates future solar project tenders to include energy storage systems with a minimum of two hours of ...
