Why is 5G a problem in Indonesia?

According to Kearney's report, limited spectrum availability further hampers Indonesia's ability to expand 5G services and achieve widespread adoption. 5G adoption remains a challenge for Indonesia, with a penetration rate of only 2% since 5G was launched in 2021.

How will Indonesia expand 5G network coverage?

The Ministry of Communication and Digital Affairs is stepping up efforts to expand 5G network coverage across Indonesia, particularly in remote and outermost areas, by optimising frequency spectrums and preparing advanced technology-based solutions, including satellite connectivity.

What is the state of 5G in Indonesia?

Current State of 5G in Indonesia Indonesia lags behind its Southeast Asian neighbours in 5G deployment, including on spectrum allocation. Since its rollout in 2021, Indonesia currently ranks 9th out of 10 ASEAN countries in mobile and fixed broadband performance.

What is the 5G penetration rate in Indonesia?

Since its launch in 2021, the 5G penetration rate in Indonesia has only reached 2 percent. According to the Kearney report, this low penetration is due to limited infrastructure, such as the minimal number of transmitter stations, inadequate fiber optic networks, and limited frequency availability.
