## Could US tariffs threaten Indonesia's solar panel exports?

Indonesia's solar panel exports have soared in recent years, reaching record highs despite mounting trade pressure from the United States. Now, a petition filed by U.S. manufacturers could trigger new tariffs that threaten Indonesia's growing presence in the clean energy market.

## Does Indonesia's plan to export solar power spur investment?

The plan to export solar power has spurred investments in the manufacturing of components, according to a January 2025 report by the Jakarta-based Institute for Essential Services Reform (IESR). "Foreign solar manufacturers are significantly increasing their investments in Indonesia..."

## Why is Indonesia sluggish on solar energy?

Despite the slow adoption of solar power at the national level, Indonesia's renewable energy sector is seeing an influx of investments, largely driven by government initiatives and international collaborations. Experts attribute the country's sluggish embrace of solar energy to its continued dependence on low-cost, coal-fired power generation.

## Why is Indonesia promoting floating solar farms?

To attract investments, the Indonesian government is promoting floating solar farms located in reservoirs, or installing them offshore, to avoid the high costs of land procurement and having to relocate local residents. "We are aiming to support that project," said Mr Anthony, referring to the plan for Batam to export renewable energy to Singapore.
