Can you go off-grid with a solar inverter system?

Stay powered with the industry's most trusted inverter systems Start your sustainable energy journey today. Going off-grid doesn't have to be complicated. We provide professional off-grid solar installations across Canada designed to fit your location and energy needs.

Can a solar system power a large load?

You can still power large loads using solar, but your system components will need to be larger in order to store the additional energy required. There is a direct correlation between your overall loads and the system cost. You will need to balance convenience with practicality.

How much energy does an off-grid solar system produce a day?

It generates as much as 15,000 Wh of solar energy a day. This comprehensive system can produce up to 30,000 Wh per day. It can handle high-demand loads that include appliances like an air conditioner, dryer, and furnace blower. At SRB Energy, we provide off-grid solar kits in Canada.

What size off grid solar system do I Need?

The size of your solar system is entirely dependent on your electrical load. In other words, to find out what size off grid solar system you need, you need to find out your estimated daily watt/hour consumption.
