Iran has ordered government offices and banks across much of the country to close for a day. Surging summer temperatures and a worsening water crisis are straining the power grid.

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, and the promising yet challenging road ahead.

In addition to the above power plants, there was 1800 MW cumulative installed capacity in 2011, which belonged to small -scale decentralized power plants, some of which were not connected ...

Without robust storage infrastructure, that target's about as reliable as a sandcastle at high tide. But get this right, and Iran could potentially export clean energy to neighbors while stabilizing ...

Iran has ordered government offices and banks across much of the country to close for a day. Surging summer temperatures and a worsening water ...

Siah Bisheh Pumped Storage Power Plant, also known as Siah Bisheh Power Plant, is a hydroelectric power plant located in the foothills of the Alborz mountain range and adjacent to ...

In this research, a site selection method for wind-compressed air energy storage (wind-CAES) power plants was developed and Iran was selected as a case study for modeling.

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, ...

Iran's energy minister says 6 gigawatts (GW) of new electricity capacity will be connected to the country's
