What is a custom-built greenhouse?

Our custom-built greenhouses use durable, food-grade materials and are optimized for Malaysia's tropical climate, featuring efficient ventilation, irrigation, and temperature control systems. Whether you're an agribusiness, research institution, or community farming project, we offer tailored solutions to meet your needs.

Why do you need a customized greenhouse system?

Whether you're farming in highlands, slopes, or plains, we offer a customizable greenhouse systems to suit every terrain: Every solution is designed to maximize efficiency and productivity while reducing operational costs. We provide cutting-edge irrigation and climate control systems that fit any agricultural or industrial requirement.

What is a greenhouse?

A growing environment designed specifically for you. A greenhouse is an aluminum-framed structure, glazed with glass or polycarbonate, that is used to propagate and/or grow plants. Solar Innovations® designs and manufactures custom greenhouses to each customer's exacting specifications, no matter the size or purpose.

What is a commercial greenhouse?

Commercial greenhouses are built tough to withstand the day-to-day use of floral shops, garden centers and other companies that require an optimal growing environment in any season. They are typically designed with thermally-enhanced framing and utilize insulated low-E glazing that assists in regulating temperatures and light transmission.

Our custom-built greenhouses use durable, food-grade materials and are optimized for Malaysia's tropical climate, featuring efficient ventilation, irrigation, and temperature control systems.
