On behalf of the German Federal Government, KfW is supporting the construction of a large photovoltaic system with an installed capacity of up to 100 MW to promote decarbonisation. It ...

Kosovo is significantly advancing its solar energy sector, with expectations to add 100 MW of new solar capacity by the end of 2025. This expansion will be driven by the ...

As part of the EU's global energy transition initiative, Kosovo is set to host one of the largest solar photovoltaic power plants in the region, supported by combined funding from the European ...

This plant, with a capacity of up to 120MWp, aims to boost the utilization of solar energy in power generation, fostering energy supply security, hastening the green transition, ...

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar ...

Unisolar has successfully completed a landmark 7.4 MW solar project in Kosovo, marking a significant milestone in the nation's ongoing transition toward renewable energy.

In Kosovo, the integration of renewable energy sources, such as wind and solar energy, is progressing rapidly. However, challenges such as voltage stability and power losses need to ...

Lack of Government Guarantees: The absence of a government guarantee for Power Purchase Agreements (PPAs) creates risks for lenders and project sponsors, discouraging non-recourse ...

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million

Large-scale solar power generation system in Kosovo
