Which mobile networks are used in Malawi?

Mobile Networks: Given the limited fixed infrastructure, mobile networks carry the bulk of internet traffic in Malawi. The country's two dominant mobile operators - Airtel Malawi (a Bharti Airtel subsidiary) and Telekom Networks Malawi (TNM)- provide nationwide 2G/3G coverage and have invested in 4G LTE to improve data services .

Does Malawi have a telecom project?

Improved Power Supply: While not a telecom project per se, Malawi is investing in improving its electricity generation and grid (such as new solar farms and interconnectors with Mozambique). By mid-2020s, incremental progress on electrification is expected.

Does Malawi have a 3G network?

In 2023, Liquid Intelligent Technologies launched a new fiber route between Zambia and Malawi to provide faster, more direct access to backbones and data centers. As of early 2025, Malawi had 13.2 million active mobile cellular connections, representing about 60.3% of the population, with more than 90% on 3G or 4G networks.

How many mobile cellular connections are there in Malawi?

As of early 2025, there were 13.2 million mobile cellular connections active in Malawi, equivalent to about 60.3% of the population . (Many individuals own multiple SIMs, so unique mobile users are fewer.) Over 90% of these connections are on 3G or 4G networks, meaning most subscribers have devices capable of mobile broadband .

Also, telecom operators are increasingly using solar-powered base stations in off-grid areas to extend coverage

sustainably. If the power situation improves even marginally, it ...

The global solar container and mobile power station market is experiencing unprecedented growth, with portable and distributed power demand increasing by over 350% in the past three ...

Malawi is gearing up for 5G, with trials starting in Lilongwe and Blantyre in 2025. This high-speed network could power smart cities, e-health, and online education.

China Tower and Huawei conducted joint pilot verification in 2018 and found that the 5G Power solution could support effective 5G site deployment without changing the grid, power ...

Also, telecom operators are increasingly using solar-powered base stations in off-grid areas to extend coverage sustainably. If the ...

TNM has already started the rollout of 5G sites, including Clocktower Mall in Blantyre (opposite Mwaiwathu Hospital) and Bingi International Convention Centre in Lilongwe.

Analysing Malawi's solar market, this paper illustrates how moral claims about off-grid solar products often sit incongruously with the realities of global supply chains and poor market ...

The investment - carried out in partnership with China's Huawei - will ensure TNM's 5G network can handle internet speeds of up to 600Mbps per site with 50MHz of spectrum, and up to ...

While 5G networks are constructed and consumers adopt 5G phones in increasing numbers, the application of the new technology in industry and business is making progress..

The pilot 5G service was initially tested in Lilongwe and Blantyre, with plans to expand to Mzuzu and Zomba soon. Customers in these areas can now enjoy markedly ...

The company says it plans to gradually expand 5G coverage to more areas across the country. As the digital age accelerates, TNM's ...

The company says it plans to gradually expand 5G coverage to more areas across the country. As the digital age accelerates, TNM's bold step signals a promising future for ...
