US energy storage start-up XL Batteries said today it has secured a USD-7.5-million (EUR 6.4m) investment from Merrin Investors, ...

Form Energy develops and manufactures multi-day energy storage systems based on iron-air batteries. These batteries are capable cost-effectively store energy for 100 ...

PolyJoule makes organic polymer-based batteries aimed at stationary grid storage. Their chemistry is non-flammable, low-cost, and works well in extreme climates, making it attractive ...

Entrepreneurs harness cutting-edge research in materials science and engineering to create batteries that cater to dynamic energy demand patterns. In this rapidly changing ...

We've been tracking startups trying to make their mark in the battery / energy-storage industry: Here are 10 of the most promising.

Startups like Fluence and Form Energy began developing iron-air batteries that could store power for 100 hours - basically giving renewable energy a photographic memory.

Meet Teague Egan, founder of EnergyX, who has been dubbed by some as The Lithium King. To meet this moment, he created extraction technology that he says can recover ...

In our interview with Chiang, we asked him to draw on his entrepreneurial and MIT research experience on advanced materials and related device technologies while giving his ...

Thomas Sisto, the CEO and co-founder of XL Batteries, hadn't planned on joining the energy storage fray.
