Based on the data collected and international best practice, recommendations are provided for energy efficiency standards and labels for refrigerators and air conditioners.

In this paper, a new system that couples the solar-driven absorption chiller and radiative sky cooling is proposed to realize 24-h continuous cooling with less floor space and ...

With climate change and conflict increasing food insecurity across the Sahel, Amadou Sidibe-a GFN member and Malian architect, has built a fully automated greenhouse where fruit and ...

Africa GreenTec Asset GmbH implements sustainable energy solutions that supply entire village communities in rural regions of Mali with electricity. This will also allow people to learn about ...

The aim of this paper is to study the thermal performance of a new solar heating system. This system is based on the selective absorption of solar radiation by a collector, with ...

In this paper, a new system that couples the solar-driven absorption chiller and radiative sky cooling is proposed to realize 24-h ...

Based on the data collected and international best practice, recommendations are provided for energy efficiency standards and labels ...

Historically, many villages in Mali have faced challenges due to unreliable electricity supply. However, the introduction of renewable energy technology in Karan has ...

This training course offers participants practical knowledge on designing, implementing, and managing automated greenhouse systems. Participants will explore the integration of sensors, ...

Insecurity caused by extremist attacks is another challenge to expansion in Mali, especially in the north, limiting the areas where companies can safely set up solar mini-grids.

In the quest for optimal climate control in greenhouses, mini-split AC systems emerge as a versatile ...

Put your climate control on autopilot with a solar powered controller that opens vents, powers fans and rolls shade curtains using clean energy ...

The aim of this paper is to study the thermal performance of a new solar heating system. This system is based on the selective ...

In the quest for optimal climate control in greenhouses, mini-split AC systems emerge as a versatile solution. By strategically positioning these units, growers can efficiently ...

Put your climate control on autopilot with a solar powered controller that opens vents, powers fans and rolls shade curtains using clean energy captured from your greenhouse roof.
