Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

What is the long-term energy policy of Mauritius?

In April 2007, the Government of Mauritius adopted the 'Outline of the Energy Policy 2007-2025 - Towards a Coherent Energy Policy for the Development of the Energy Sector in Mauritius'. This document outlines the Government's long-term vision for the energy sector.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

Is the energy strategy in Mauritius sustainable?

The energy strategies in Mauritius, which have been demand-driven without incentives to reduce demand, can no longer be sustainable. It is the duty and responsibility of the Government to work towards decreasing carbon dioxide emissions in light of environmental issues.

In his address, Minister Lesjongard underlined that the 20 MW BESS is in line with Government's policy to encourage the use of Renewable Energy and clean energy in view to ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and ...

Paris, August 7, 2025 - Independent renewable energy company Qair announces the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage ...

Furthermore, this initiative has leveraged technologies such as Battery Energy Storage Systems and Smart Grids to support the deployment of a 18 MW battery energy ...

Under the 2022-2023 national budget, the government committed to initiatives including setting up 140MW of hybrid renewables-plus-storage facilities with private entities, ...

In his address, Minister Lesjongard underlined that the 20 MW BESS is in line with Government's policy to encourage the use of ...

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the ...

Under the 2022-2023 national budget, the government committed to initiatives including setting up 140MW of hybrid renewables ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ...

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible within reasonable costs. Solar photovoltaic (PV) and battery energy ...

A significant portion of this funding--Rs 1.4 billion--is earmarked for a second Battery Energy Storage System (BESS) designed to stabilize the electricity grid as Mauritius ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, ...

A significant portion of this funding--Rs 1.4 billion--is earmarked for a second Battery Energy Storage System (BESS) ...
