How does Moldova share energy data?

Moldova shares energy data through five annual International Energy Agency (IEA)/Eurostat/UN Economic Commission for Europe (UNECE) joint questionnaires.

What is the main energy source in Moldova?

Natural gas accounts for more than half of Moldova's total primary energy supply (53% in 2018), oil roughly a quarter (23% in 2018) and solid biomass one-fifth (19% in 2018). Most natural gas is used for electricity and heat generation,³ whereas oil is the most important energy source for final consumers.

What is Moldova's energy consumption?

Transport sector is the second-largest energy consumer (around 0.7 Mtoe) and the main driver in oil consumption growth. Renewables represent 20% of Moldova's energy mix, consisting almost fully of solid biofuels (19% in 2018). 6% of electricity generation comes from renewable sources (hydro, wind, solar PV).

Does Moldova have gas storage facilities?

Moldova currently does not have operational gas storage facilities. However, the government is considering two possible sites for geological storage in the Zagarancea-Mânzesti-Ungheni de Jos villages area and in the Cantemir district. No concrete decisions have been taken on these developments.

The storage systems will be installed at CET Nord thermal power plant in Balti. The procurement aims to improve the reliability of Moldova's grid, facilitate energy trade with ...

The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with the Ministry of Energy, includes the acquisition of a 75 MW ...

According to the official, Moldelectrica, the electricity transmission system operator, by late last May issued

connection permits for private energy storage projects with a total ...

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a ...

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to ...

The storage systems will be installed at CET Nord thermal power plant in Balti. The procurement aims to improve the reliability of ...

Moldova's ambitious push to transform its energy landscape through renewable auctions, especially the innovative integration of wind power with battery energy storage ...

The government of Moldova has approved an indicative calendar for upcoming auctions aimed at awarding contracts for renewable energy and energy storage projects, with ...

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 ...

According to the official, Moldelectrica, the electricity transmission system operator, by late last May issued connection permits ...

The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with the Ministry of ...

State-owned enterprise Energocom, the country's electricity and gas trader, actively facilitated the purchase of gas and electricity from non-Russian markets in 2022.

Republic of Moldova Advanced Energy Storage Systems Market is expected to grow during 2025-2031

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government ...

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal ...
