-----

Namibia's just made a game-changing move. In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at ...

This BESS project is expected to play a key role in strengthening Namibia's power grid by adding critical storage capacity, which will support stability and flexibility, especially as ...

The Namibia Power Corporation (NamPower) has opened the Initial Selection stage for the engineering, procurement, and construction ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply ...

The Namibia Power Corporation (NamPower) has opened the Initial Selection stage for the engineering, procurement, and construction of the 45 MW / 90 MWh Lithops battery ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage ...

Today marks the approval of Namibia's first ever World Bank financed energy project, aimed at improving the reliability of the country's transmission network and enabling ...

The project is scheduled for completion in 2026 and is expected to play a pivotal role in strengthening the country's renewable energy transition. The Omburu BESS will ...

Expressing commitment and determination, Jin Bei, a representative from SDEE, pledged to construct a state-of-the-art facility, aiming to make it a benchmark in Namibia's new ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

The Ombru Energy Storage Project is located in central northern Namibia, with a designed storage capacity of 51 megawatt hours. It can release electricity to the grid during ...
