How will energy storage affect New York's energy grid?

In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

What is New York's energy storage goal?

New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030.

Enter UHV Power Storage - the heavyweight champion of energy systems. Combining Ultra-High Voltage (UHV) transmission with cutting-edge storage tech, this ...

Planning has been underway for months and this effort builds on the efforts of New Energy New York and the Upstate New York Energy Storage Engine. We are excited and ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of

New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

Given the growing demand for electricity, UHV energy storage is anticipated to become increasingly vital in providing reliable and stable energy supplies. The core principle of ...

Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

Utility-owned storage can be deployed to help New York achieve its climate and storage deployment goals while providing a uniquely valuable resource in addressing transmission ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

In June 2024, Governor Hochul announced that the Commission had approved a new Energy Storage Roadmap for the state to achieve a nation-leading six gigawatts of ...

Planning has been underway for months and this effort builds on the efforts of New Energy New York and the Upstate New York Energy ...

Battery growth spurt Battery energy storage systems that suck up cheap power during periods of low demand, then discharge it at a profit during periods of high demand, are considered critical ...

Given the growing demand for electricity, UHV energy storage is anticipated to become increasingly vital in providing reliable and stable ...
