-----

This study proposed a novel composite wall (NCW) with an independent modular wall made of expanded polystyrene board and reinforced concrete (EPCW), and a solar water ...

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the ...

To increase the temperature of the internal temperature stabilisation layer and the heat storage and release characteristics of the wall, a novel greenhouse wall with micro-heat pipe arrays ...

Building heating and cooling energy demands can be reduced through thermal energy storage. This Review details the economic, environmental and social aspects of the ...

Therefore, a novel active-passive heat storage wall system (APHSWS) incorporating phase change materials has been developed to ...

This study investigates the integration of renewable energy technologies, including solar thermal, solar photovoltaic (PV) and photovoltaic-thermal (PVT), geothermal, and ...

Therefore, a novel active-passive heat storage wall system (APHSWS) incorporating phase change materials has been developed to promote the thermal ...

The modular heat storage wall is a new type of solar greenhouse wall structure, which has the advantages of fast construction and good heat storage ability. ...

The wall can effectively transfer heat emitted by the sun to the interior of the wall body and store the heat by the wall body, thereby effectively improving the heat storage amount of the...

Results outline key considerations for energy demand characteristics and the renewable energy technologies and strategies available to meet energy needs more sustainably, reliably, and ...

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts ...
