---

Peak Energy, a U.S.-based company developing low-cost, giga-scale energy storage technology for the grid, today announced the deployment and operation of its ...

The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage ...

The evolution of low-cost energy storage technologies remains pivotal amid the global transition to sustainable energy systems. As renewable energy adoption accelerates, ...

This report demonstrates what we can do with our industry partners to advance innovative long duration energy storage technologies that will shape our future--from batteries to hydrogen, ...

This analysis supplements prior studies and evaluates the extent to which diverse types of emerging long-duration energy storage (LDES) and multi-day energy storage (MDS) ...

Peak Energy, a U.S.-based company developing low-cost, giga-scale energy storage technology for the grid, today announced the ...

In the new announcement, Fourth Power stated that its thermal energy storage system costs less than \$25/IWh-e and is scalable up to 100+ hours of storage. The system is ...

Robust, efficient, cost-effective long-duration electricity storage (LDES) solutions can enhance grid resiliency, support existing transmission and distribution infrastructure, and ...

The proposed Implementation Plan filed by NYSERDA and approved by the PSC with modifications will help facilitate the development of 3,000 MWs of new bulk energy ...

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid.

"By replacing the outdated district heating loop with a decentralized, flexible thermal energy storage system, SUNY is able to modernize its infrastructure in a cost-effective and ...
