China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

In this blog, we'll explore the latest advancements like TOPCon solar technology, Mono PERC panels, bifacial solar panels, and 625W solar modules, all setting new benchmarks in ...

Discover 2025's latest solar panel tech, from perovskite tandems to bifacial panels, and what's next for solar energy.

Flat solar panels have come to an end; a new design is being developed. There is a solar panel in the works that isn't really a panel at all. This is more like a flexible surface. It's ...

These advances are making solar technology more powerful, affordable, and versatile, accelerating the adoption of solar energy technology across residential, commercial, ...

We examine the latest solar panels and explain how advanced PV cell technologies help improve performance and efficiency, ...

We now have bifacial panels that capture sunlight from both sides, perovskite solar cells that promise higher efficiency at lower costs, and smart solar tracking systems that ...

Here's a compilation of the latest solar panel technology that you should be aware of. 1. Bifacial Solar Panels. Bifacial solar panels are a significant advancement in the latest solar panel ...

We explore the nine most exciting developments in the solar industry in 2025, from indoor solar panels to "two-for-one" fission.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

We examine the latest solar panels and explain how advanced PV cell technologies help improve performance and efficiency, plus we highlight the most advanced ...
