Why should I join Nordic solar?

Joining Nordic Solar means building a career with exciting opportunities. You will find a space to grow, learn and engage in a collaborative environment. Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available.

Where is Nordic solar launching its first battery energy storage system?

Yesterday, Nordic Solar officially inaugurated its first battery energy storage system (BESS) park in Denmark. The facility, located in Borup in the Municipality of Hiller&#248;d, marks a great milestone in the company's strategy to integrate battery storage into its portfolio of solar energy projects across Europe.

What trends should a solar developer know about the Nordic power system?

The Nordic power system is undergoing significant structural changes, and as a solar developer, below are the key trends you should be aware of: Grid capacity: As in most grids in Europe, grid capacity is always a challenge. As competition for developing renewable energy is sharpening, securing capacity early is key.

Why should you choose Nordic systems engineering?

At Nordic Systems Engineering, we work to fulfill all your technological needs. With our diverse team of individuals, we give you an environment where you may worry about what you're making rather than how when it comes to the development of your products. In an ever advancing world, data is the most critical part of any industry or business unit.
