How much does a 40 ft container cost in 2025?

On April 24, 2025, the Drewry World Container Index (WCI) showed a 2% drop, bringing the cost to \$2,157 per 40-foot container. This is still considerably higher than pre-pandemic rates but reflects a 79% drop from the peak seen during the COVID-19 surge in September 2021.

How do container freight costs differ from Port to Port?

Moving container costs for goods from port to port and country to country differs majorly depending on several key factors that are given below: Container freight cost is dependent on the route you select from the port of origin to the port of destination.

Why are container ships so expensive?

The global container fleet consists of over 30 million TEUs (twenty-foot equivalent units), but availability can fluctuate wildly. Overproduction during boom times often leads to price drops. Both underproduction and hoarding, often seen during crises, can lead to significant price hikes. Seasonality plays a role, too.

The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000. But that's just the tip of the ...

Use our free calculator to get instant 20" and 40" container shipping cost estimates! Get a clear understanding of your shipping ...
