-----

With global renewable energy capacity projected to grow by 75% by 2030, reliable storage solutions like the Pristina system have become critical. Imagine solar panels producing excess ...

Designed as modular power hubs, these cabins store excess electricity from solar panels, wind turbines, or the grid, releasing it when demand peaks or supply drops.

Grid-connected PV systems shall meet grid connection requirements and approved by power companies before connecting to the grid. In accordance with the Electricity Ordinance (EO), ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in ...

With a grid-connected system, a home can use the solar energy produced by its solar panels and electricity that comes from the utility grid. If the solar panels generate more electricity than a ...

Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid services.

Our smart hybrid inverters offer seamless integration between solar power systems, energy storage units, and the grid. Equipped with intelligent algorithms, they enable real-time ...

The Pristina solar heating plant is a landmark project that underscores a broader European commitment to renewable energy. It demonstrates that with strategic investment ...

Whether you're seeking off-grid independence or grid-connected benefits, we provide reliable Energy Storage

Solutions that ensure performance, safety, and long-term sustainability..

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe ...

A photovoltaic energy storage project so efficient it could power 15,000 homes while making traditional power plants blush. That's exactly what Kosovo's Pristina Photovoltaic Energy ...
