Can a yellow air conditioner be reversed?

Once the plastic has turned yellow, it is not possible to reverse the process. Therefore, if you wish to avoid the yellowing process, do keep your air-conditioners away from UV exposure, especially if sunlight enters through a window during the day. How do I remove yellow stains from my air-conditioner?

Why do air conditioners turn yellow?

Yellowing is a very common occurrence in ageing air-conditioners. But what causes them to turn yellow? The main reason would be oxidation, be it from exposure to UV rays, heat, or even sulfurization from air pollutants. These would make fundamental changes within the molecular structure of the plastic which eventually results in yellowing.

Will regular aircon service return my yellow aircon back to white?

Regular aircon servicing can maintain your aircon's function, but regular cleaning will not be able to return your yellow aircon back to white. In this article, we will guide you to remove, and get rid of yellow stains from your air-conditioner.

What should I do if my air conditioner turns yellow?

Control humidity: Use a dehumidifier to reduce moisture levels in the air, preventing mold and mildew growth. Schedule regular maintenance: Have your air conditioner inspected and serviced by a qualified technician annually to ensure proper operation and prevent yellowing.
