-----

Semi-tempered photovoltaic glass, by balancing performance and cost, has become one of the important materials in the photovoltaic industry, especially suitable for application scenarios ...

Solar Glass combined with nanometer anti-reflective coating technology is applied for solar modules. It increases solar transmittance by way of decreasing light reflectance, thus ...

Glass is divided into fully tempered and semi-tempered according to the degree of physical tempering: fully tempered glass is 4 to 6 times stronger than ordinary glass, and semi ...

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. ...

Our 2 mm solar glass is exclusively produced in a float glass process. This industrial process adheres to very strict production tolerances and guarantees a very low defect density.

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and ...

Semi-tempered photovoltaic glass is also called heat-reinforced glass. It is a type between ordinary flat glass and tempered glass. It has some advantages of tempered glass, ...

Low-iron Patterned Solar Glass is specially designed for the double glass PV modules. The glass has the characteristics of high light transmittance, low light absorption, low reflectivity, ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

Low-iron Patterned Solar Glass is specially designed for the double glass PV modules. The glass has the characteristics of high light transmittance, low ...

Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light ...

Our 2 mm solar glass is exclusively produced in a float glass process. This industrial process adheres to very strict production tolerances and ...

Relying solely on manufacturer terminology (which can sometimes be misleading, such as "Solar Tempered Glass" for what is actually semi-tempered glass) poses risks to ...
