-----

The fully-integrated lithium-ion ESS will comprise six Saft Intensium Max High Energy containers, providing a total of 13.8 MWh (megawatt-hour) energy storage, together with power ...

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 GW that will be colocated with two ...

Now, the government has given a tick of approval to the proposed sites - which include the cities of Zajecar and Leskovac and the four municipalities of Bujanovac, Lebane, ...

Now, the government has given a tick of approval to the proposed sites - which include the cities of Zajecar and Leskovac and the ...

This article explores Serbia's growing energy storage market, analyzes industry trends, and highlights how companies like EK SOLAR deliver tailored solutions for commercial and ...

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

Serbia's path to a stable, renewable-dominated energy system will be written not only in wind turbines and solar panels but in the batteries that make their power dependable.

As global demand for energy storage lithium battery chassis surges, Serbia has emerged as a competitive player in manufacturing high-performance battery systems.
