-----

In this study, a comprehensive thermodynamic analysis was performed to evaluate and optimize the performance of a solar-powered single-effect lithium bromide-water ...

The main objective of this study is to assess the performance of solar Lithium-Bromide-H<sub>2</sub>O absorption air conditioning system for a conference hall under hot climate conditions.

tioner can mitigate energy loss and reduce CO<sub>2</sub> emissions and the need to allocate such systems is very important. In this study, a thermodynamic analysis was ...

In the present work, a mathematical model for modeling an absorption solar air conditioner with a LiBr-H<sub>2</sub>O couple is presented.

The aim of this study is to design a lithium bromide-water (LiBr-H<sub>2</sub>O) absorption cooling system with a rated capacity of about 1 kW of solar-powered cooling using lithium ...

Abstract-- This paper reviews past efforts in this field of solar operated air-conditioning systems using the absorption pair of lithium bromide/water. A number of attempts have been made by ...

Experimental evaluation of a direct air-cooled lithium bromide-water absorption prototype for solar air conditioning, Applied Thermal Engineering (2011), doi: ...

In this paper, it focuses on the solution for the remote control system in solar energy lithium bromide absorption refrigerating air conditioner, and it based on field bus technology, this ...

A commercially available 3-ton residential Lithium Bromide (LiBr) absorption air conditioner was modified for use with lower temperature solar heated water.

In this work, a mathematical model of the Single-Effect Solar Absorption Cooling system (SESAC), utilizing Lithium Bromide-Water (LiBr-H<sub>2</sub>O) as the working fluid, has been ...
