Are Chinese solar power inverters 'undocumented'?

U.S. security experts have reportedly uncovered undocumented communication devices inside Chinese-made solar power inverters -- hardware that's widely used to support renewable energy infrastructure.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented 'rogue' communication devices hidden inside solar power inverters imported from China.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by ...

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy ...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment ...

LONDON: US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained ...

U.S. security experts have reportedly uncovered undocumented communication devices inside Chinese-made solar power inverters -- hardware that's widely used to support ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

On May 14, 2025, U.S. energy officials began investigating Chinese-made solar power inverters after discovering undocumented communication devices, including cellular radios, inside some ...

US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found ...
