How have new federal actions impacted wind & solar projects?

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay on track. Facing delays or need guidance navigating these shifts?

Is USFWS still available to process solar and wind energy projects?

In light of this uncertainty, USFWS moved to update their Information for the Planning and Consultation (IPaC) portal on July 18, 2025, to state that the resource is no longer available to process solar and wind energy projects.

When will a wind and solar project be placed in service?

Under the guidance provided in the Notice, wind and solar projects beginning construction in 2025 would have a placed in service deadline of Dec. 31, 2029, and those beginning construction in 2026 on or before July 4 would have a placed in service deadline of Dec. 31, 2030.

When do wind & solar projects have to be taxable?

(See McGuireWoods' July 8, 2025, legal alert.) The OBBBA requires wind and solar projects to begin construction for tax purposes on or before July 4, 2026, or be subject to a placed in service deadline of Dec. 31, 2027.

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to
