Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

PURE SOLAR, a cutting-edge clean energy company, has unveiled a groundbreaking photovoltaic solution tailored for curved roofs in the Netherlands. This initiative addresses structural and load-bearing challenges that previously ...

Our expertise in precision glass bending ranges from simple 2D curved glass panels to complex 3D forms, including round, spherical, and asymmetrical models, as well as sagged variants and curved ...

With two layers of silver applied to the glass, Guardian SN 70/41 provides high natural light transmission (70%), solar control and thermal insulation properties, while helping to minimize the need for artificial light.

Crowning the building is one of the most technically complex glass rooftops in modern architecture. Composed of 255 fully customized curved glass panels, each one unique, the structure ...

Natural light pours through the glass roof, reflecting off the stainless steel panels of the spiral structure to create a dynamic interplay of light and shadow. The museum embodies the rich ...

Uniquely, WavePerform is a curved (insulation) pane that is both concave and convex (concave and convex). Round architecture limits visual delay and contributes to harmony between nature, urban ...

Bodar Glas Productions is an enthusiastic and flexible specialist company. It manufactures and consults in the field of curved glass.
