-----  
What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour(kWh). Whereas the price per watt considers the solar system's size,the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system /lifetime output = cost per kilowatt hour

How much does solar panel installation cost?

Solar panel installation costs depend on your home's size,energy needs,roof structure,and location. You can estimate around \$10 to \$15 per square foot of living space for solar panel installation. Keep in mind,this estimate doesn't account for tax credits or local incentives,which can significantly reduce your final cost.

How much does a solar system cost?

Based on current marketplace data,you're looking at around \$21,000 to \$23,000before incentives for a typical 7-8 kW system,or up to \$29,000 for larger 12 kW installations. This is where the numbers get interesting. The federal solar tax credit - officially called the residential clean energy credit - knocks 30% off that price tag.

How much do solar panels cost for a 3 bedroom house?

What's the cost of solar panels for a 3-bedroom house? The average pre-incentive cost of home solar is \$29,161for a three-bedroom house,or \$20,412 after claiming the 30% tax credit.
