How much does it cost to install solar panels?

The chart below shows the ballpark installation costs for commercial solar systems, covering monthly electric bills of \$600, \$1,200, and \$2,400. The average cost of installing a residential solar panel system ranges between \$2 and \$3 per watt.

How much does a commercial solar system cost?

Tax credits, incentives, and long-term energy savings often outweigh the higher upfront price, delivering strong ROI for businesses and homeowners. The average commercial solar panel system will cost between \$1 and \$2.50 per watt. Businesses should expect to pay between \$125,000 and \$500,000+ before any tax incentives or grants are utilized.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a residential solar system cost?

The 30% federal tax credit for residential solar systems substantially lowers the overall cost (the residential tax credit ends after December 31, 2025), making solar energy even more affordable. After applying these incentives, a typical homeowner can expect to pay between \$18,000 and \$38,000 for a 5 kW to a 15 kW solar panel system.
