In October 2009, the city of Antwerp announced that they planned to install 2,500 m² of solar panels on roofs of public buildings, that would generate 265 MWh per annum.

The graph above illustrates the significant growth in solar electricity generation in Belgium in recent years, particularly in 2022 and 2023, coinciding with the implementation of ...

The EU Renewable Energy Directive III orders every member state to hit 42.5% renewables in final energy use by 2030, forcing Belgium to average roughly 1.2 GW of solar ...

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 201 locations across Belgium. This analysis provides insights into each city/location's potential for ...

Europe's second-largest port now generates 18MW through photovoltaic modules on warehouses - enough to power 5,000 households annually. This project proves that even in cloudy ...

The EU Renewable Energy Directive III orders every member state to hit 42.5% renewables in final energy use by 2030, forcing ...

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 201 locations across Belgium. This analysis provides ...

The facility carries constitutes of 17250 solar panels capable of producing 7 GWh per year. The project started back in 2017 and did not ...
