-----

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid expansion of renewable energy ...

China's installations of wind and solar in May are enough to generate as much electricity as Poland, as the world's second-biggest economy breaks further records with its ...

Expected to collect energy at a constant rate more than 10-times more efficient than photovoltaic panels on Earth, China is planning ...

Positioned approximately 36,000 kilometers above Earth, this groundbreaking initiative seeks to establish a massive space-based solar ...

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's ...

Located on the Gobi Desert near Dunhuang City, northwest China's Gansu Province, it is currently the tallest molten salt tower CSP (concentrated solar power) station globally, with ...

Companies like Space Solar are devoted to transforming the bold vision of space-based solar power into a tangible, revolutionary ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

China has recently announced an ambitious initiative to create a monumental space-based solar power station, a project that could ...

Expected to collect energy at a constant rate more than 10-times more efficient than photovoltaic panels on Earth, China is planning to build a solar array 1km-wide.

Positioned approximately 36,000 kilometers above Earth, this groundbreaking initiative seeks to establish a massive space-based solar power plant capable of generating ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

Companies like Space Solar are devoted to transforming the bold vision of space-based solar power into a tangible, revolutionary energy source. In just over a decade, it plans ...

China has recently announced an ambitious initiative to create a monumental space-based solar power station, a project that could revolutionize the global energy landscape.

Located on the Gobi Desert near Dunhuang City, northwest China's Gansu Province, it is currently the tallest molten salt tower CSP ...

In energy, tension between China and the UK is being exploited to undermine support for the UK government's strategy.
