What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) (also known as backup power systems) provide emergency power during electrical outages, ensuring continuous operation for critical equipment. Commonly used in data centers, hospitals, and industrial facilities, UPS systems protect sensitive electronics from power surges, voltage drops, and interruptions.

Where can I find an uninterruptible power supply?

Search Newegg.com for uninterruptible power supply. Get fast shipping and top-rated customer service.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

Why should you use an ups power supply?

While UPS power is great for avoiding a sudden shutdown, you should not expect it to power your equipment for long hours without additional electrical backup, such as a generator. The main purpose of a UPS is to give you time to switch to alternative power or properly shut down your machine. Benefits of an uninterruptible power supply.
