Kiribati launches its largest solar PV project, the 7.5 MW South Tarawa Renewable Energy Project, supported by the ADB and New Zealand.

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

The repository includes the full text of contracts; plain language summaries of each contract's key social, environmental, human rights, fiscal, and operational terms; and tools for ...

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional capacity across the sector, including through ...

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional ...

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by ...

Other names: South Tarawa Renewable Energy Project South Tarawa solar farm is an announced solar photovoltaic (PV) farm in Bonriki, Kiribati.

Review the complete project documentation for a detailed description. As stated by the ADB, the proposed project will initiate and contribute to the transformation of the Kiribati ...

Contract No 2 details the design and build of a floating solar PV power plant in Tuvalu, which additionally
