This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

The SolarContainer is highly configurable, with the ability to seamlessly adjust the solar, battery, and inverter capacities to optimally serve your energy loads.

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
