-----

The overall project aims to enhance the reliability and optimise the existing fault clearance system of transmission and distribution (T&D) networks of Sri Lanka's two grid ...

This report delves into the transformative phase of Sri Lanka's energy sector, highlighting the growing adoption of renewable energy sources like solar and wind power.

Issuing a statement, the CEB said this groundbreaking 600 MW project will store excess renewable energy from solar and wind sources, ensuring grid stability and supporting ...

In conclusion, the Maha Oya "Water Battery" represents a significant step toward a cleaner energy future for Sri Lanka. Balancing the benefits of renewable energy storage with ...

SgurrEnergy has secured the contract to develop Sri Lanka's first 100 MW solar photovoltaic project with a 12 MWh battery energy storage system (BESS). It will be ...

The Ministry of Power and Energy has received cabinet approval to establish 160 megawatt battery energy storage systems at 16 identified locations nationwide. Ministry ...

Sri Lanka's state-owned utility, the Ceylon Electricity Board (CEB), has issued a Request for Proposals (RFP) for the development of 160 MW/640 MWh of standalone battery ...

As Sri Lanka's energy demands evolve, hybrid renewable systems combining solar, wind, and battery storage are becoming the new normal. ISL is proud to be part of this ...

Issuing a statement, the CEB said this groundbreaking 600 MW project will store excess renewable energy from solar and wind ...

Sri Lanka's energy sector is entering a transformative phase with the planned construction of the Maha Oya Pumped-Storage Power Station -- the country's first large-scale ...

The project establishes Sri Lanka's largest non-government-funded battery energy storage system (BESS), powered by solar photovoltaic (PV) technology. The Battery ...

The project establishes Sri Lanka's largest non-government-funded battery energy storage system (BESS), powered by solar ...

The overall project aims to enhance the reliability and optimise the existing fault clearance system of transmission and ...
