What is containerised battery storage?

A long-term solution: our containerised battery storage solutions are built to last for decades. Your system's precious lithium-ion core is housed in an incredibly tough shipping-grade container. Battery storage from solar panels, wind turbines or water sources can give you the independence you need.

Where can I rely on a containerised energy storage solution?

Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries).

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Should I add home battery storage to my solar power system?

However, adding home battery storage to a new or existing solar power system allows you to store your unused energy. This makes your solar energy setup more efficient and maximizes the benefits of your solar PV installation.

It consists of stackable battery modules each 3.2kWh in capacity (100% usable energy). Simply stack the modules on top of each other and there is no wiring involved. Inbuilt plugs in each ...

They last longer, charge faster and require little to no maintenance, making them ideal for homes, farms and commercial sites across New Zealand. ...
