Are there state-level incentives for solar energy storage?

To date, state-level performance incentives for storage have typically been added to solar incentives. Perhaps the best-known state-level storage incentive in the US is California's Self-Generation Incentive Program (SGIP). SGIP provides a dollar per kilowatt (\$/kW) rebate for the energy storage installed.

What green energy incentives are available in 2025?

From solar tax credits to state-specific rebates and utility-sponsored programs, there's a wide range of green energy incentives available to help homeowners and businesses make the switch. Here's your up-to-date guide to the most important incentives in 2025 -- and how to take advantage of them.

What are the most important solar incentives in 2025?

Here's your up-to-date guide to the most important incentives in 2025 -- and how to take advantage of them. The Investment Tax Credit (ITC) is the biggest incentive in the U.S. for residential solar. It allows you to deduct 30% of the cost of a solar energy system from your federal taxes.

How many EPA selectees will be able to deliver solar?

EPA announces 60 selectees under Greenhouse Gas Reduction Fund grant competition to deliver solar to more than 900,000 low-income and disadvantaged households nationwide through the President's Investing in America agenda. Contact: EPA Press Office (press@epa.gov)
