-----  
How many Tesla Supercharger stations are there?

There are nearly 2,000 Tesla Supercharger stations across all 50 states, with over 20,000 charging stalls. Tesla vehicles make finding your nearest charging station a breeze. Teslas have a built-in Trip Planner that works just like a regular GPS system, but it maps out routes that pass by Supercharger stations on the way to your destination.

What is a supercharger cost calculator?

The Supercharger Cost Calculator will allow you to select a variety of sockets and determine what type of charger you will be charging with (Level 1 or 2). The calculator will allow you to compare charging costs, and will answer the question of where it is more profitable to charge your Tesla at home or at charging station networks.

Is supercharging cheaper than a gas station?

Supercharging can often be cheaper than stopping at a gas station. However, savings ultimately depend on the Supercharger's rates and local gas prices.

How much does a Tesla Supercharger cost?

Let's dig in. When you pull up to a Tesla Supercharger, your cost depends on a few things: Right now, you'll typically pay between 25¢ and 50¢ per kWh in the US, though prices climb higher in some busy areas. Nothing beats plugging in at home. The average home electricity rate hovers around 15¢ per kWh - way cheaper than Supercharging.
