BlueGris deploys North America's first bi-directional DC fast charging for marine vessels, advancing Vessel-to-grid (V2G) electrification.

This landmark report rounds off the Virtual Bunkering of Electric Vessels (VBEV) project, funded by the UK Government, assessing the financial, technical, and operational ...

Plymouth, UK - 24th April 2025 - Aqua superPower unveiled its ground-breaking bidirectional charging technology at the University of Plymouth, marking their demonstration debut of ...

The project is aimed at enabling electric boats to charge, while also allowing boat owners to discharge their batteries and return surplus energy to the grid when the boats are ...

Aqua superPower has successfully demonstrated its revolutionary bidirectional charging system for electric boats at the University of Plymouth, introducing the marine ...

Aqua superPower has successfully demonstrated its revolutionary bidirectional charging system for electric boats at the ...

Our vision is to partner with leading marine manufacturers focused on auto docking equipment. Vessel docking, electric boat charging, GPS auto navigation, container ship mooring, offshore ...

This landmark report rounds off the Virtual Bunkering of Electric Vessels (VBEV) project, funded by the UK Government, ...
