Why do we need Smart Storage?

Smart. Effective. Integrated. Energy is increasingly delivered on demand. That's why we have to store it when we don't need it, release it during peak consumption, and balance its generation across the grid. CSEM is creating smart storage technologies to tackle the main challenges of battery technologies: charging time, lifespan and range.

What is a battery energy storage system (BESS)?

Modular, multi-story structure designed to house battery energy storage systems (BESS) for unparalleled energy density. Family of gravity energy storage products that decouple power and energy while maintaining a high round-trip efficiency, without the need for specific topography.

What is gravity energy storage?

Family of gravity energy storage products that decouple power and energy while maintaining a high round-trip efficiency, without the need for specific topography. Hydrogen energy storage for multi-day resilience, designed to ensure the reliability of critical community infrastructure.

Detailed info and reviews on 10 top Energy Storage companies and startups in Switzerland in 2025. Get the latest updates on their products, jobs, funding, investors, ...

BTRY, a Swiss battery start-up and spin-off from Empa and ETH Zurich is redefining energy storage with its customizable Li-ion solid-state battery. Our innovation takes ...

We can help you maximize your energy output via smart storage solutions across the value chain, from manufacturing to recycling. We understand the technology and have deep industry ...

We are the only energy storage company offering solutions encompassing short to long to ultra long duration

needs with proprietary battery, gravity, and hybrid-hydrogen ...

AlphaESS announces a strategic partnership with Stucky International and Voltify Systems to establish Alpha Energy Swiss SA, advancing smart battery storage solutions ...

Smartenergy is a Swiss-based investment company that specializes in renewable energy projects, with a notable emphasis on hydrogen and related technologies for energy utilization and storage.

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

AlphaESS announces a strategic partnership with Stucky International and Voltify Systems to establish Alpha Energy Swiss SA, ...

We are the only energy storage company offering solutions encompassing short to long to ultra long duration ...

Smart Energy Link (SEL) is a software developer and service provider for captive power solutions in residential and commercial buildings and quarters. SEL lowers energy ...

We can help you maximize your energy output via smart storage solutions across the value chain, from manufacturing to recycling. We understand ...

Some of the key players in the Swiss energy storage market include Leclanché, which is developing lithium-ion batteries for grid-scale applications, and Energy Vault, which is ...

Switzerland's energy scene is like a precision watch - every component must work seamlessly. With 75% of its electricity already from renewables*, the Swiss now face a "good ...
